Russian Chemical Reviews

Contents

Volume 89  
Number 2  
2020  

Pages 173 – 274

Photoacid generators. Application and current state of development  
N.A.Kuznetsova, G.V.Malkov, B.G.Gribov  
173

Lower olefins from methane: recent advances  
N.V.Kolesnichenko, N.N.Ezhova, Yu.M.Satenkova  
191

Organophosphorus chemistry based on elemental phosphorus: advances and horizons  
N.K.Gusarova, B.A.Trofonov  
225

Catalysis and regioselectivity in hydrofunctionalization reactions of unsaturated carbon bonds. Part I  
L.P.Beletskaia, C.Najera, M.Yus  
250

In the next issue

Solid-gas reactions in synthetic chemistry — what can we learn from reaction pathways?  
H.Kohlmann  

Modifications at the C(5) position of pyrimidine nucleosides  
W.Kozak, S.Demkowicz, M.Dasko, J.Rachon, J.Rak  

Phenomenology of phase equilibria and evolution of the phase structure in binary mixtures of semicrystalline polymers with low-molar-mass substances  
K.V.Pochivalov, A.V.Basko, Y.V.Kudryavtsev  

The main trends in the creation of semi-synthetic antibiotics of the new generation  
E.N.Olsufyeva, V.S.Yankovskaya  

Colloidal quantum dots of lead chalcogenides for photoelectric devices  
I.A.Shuklov, V.F.Razumov  

ISSN 0036-021X
